SPECIFICATIONS

General Description

Comes complete with the Transmitter and Receiver. Fits existing GPI G2 or A2 Meters. The Transmitter attaches to the back of the meter and sends flowrate data to the Receiver located in a remote location.

Application

Any location where the flow line is inconveniently located. Transmit flowrate from multiple buildings to a central monitoring location. Send data to multiple Receivers located in different locations. Saves time and money.

Transmitter

Battery-operated. Attaches to the back of a GPI G2/A2 Series Meter. Transmission distance is approx. 300 feet, line-of-sight. Color coded for easy installation.

Receiver

Externally powered (5-35 VDC), includes 25' of cable. Internal LED Signal Indicator confirms signal. Choose from 8 channels using 3 simple switches. Color coded for easy installation. Maximum working range is approx. 300 feet, line-of-sight.
